

**NOW I CAN SEE!**

“These glasses changed my life.”

80% of what a child learns is through their eyes.  
Yet, right now thousands of New York City school children are struggling because they can't see clearly.

So they act out. They fall behind. They feel alone.

All because their families can't afford the glasses they need.

For 20 years, **ChildSight**<sup>®</sup> has screened more than 650,000 students and provided nearly 90,000 pairs of free prescription eyeglasses to New York City children in need.
